

Cinewave

IIT BHUBANESWAR

FEBRUARY 1, 2017

Introduction

CineWave, the cinematic society of IIT Bhubaneswar has had a successful year in terms of competitions, viewer satisfaction and most importantly, the learning and enjoyment in the work by the members of the Society. The overall performance of the society did justice to the name and fame of the society which was earned over the past years through the hard work of our students. The Society has been active throughout the semester and there has been never a state of passiveness. Every member of the society participated enthusiastically in the society activities.

Introduction: Cinewave to Freshers

FRESHMEN

FIRST IMPRESSIONS

Cinewave introduced the Society to the freshers in an unconventional way by letting them know the fun behind video making by making a Harlem Shake video just after the formal power point presentations and Screening of some of the

videos was done. They were also presented with a video depicting their own reactions to the new campus life which was well received by the audience. This drew their attention to the interesting field of video making which was proved by more than 85 students turning up for the video editing workshop conducted soon after that. Cinewave has been successful in letting the new batch of students know that the art of video making is something where we can learn a lot on our own and achieve magnificent things as a team.

Viewers Reactions / Feedback

Every video made by the society was well received by the audience and some videos were praised for the quality and professionalism it showed. Cinewave has been able to deliver good videos and services even on short notices. Bringing in non-conventional techniques and ideas into videos got recognition including the winning ad presented at Spring Fest IIT Kharagpur.

Learning never stops

Cinewave is proud of the fact that every video that has been made enabled the ones who work hard for that learn new things. Techniques like background noise removal, keying out of backgrounds in videos, hyper lapse videos etc. were introduced thanks to this. Every work was done by the society, big or small are only done in teams to gather ideas and to have a better result. The fresher's video which was made after the arrival of our new batch was the work of 10 members of the society working together. These sessions give us ideas and new directions to work forward. Since video making is a field where there is almost nothing that limits creativity, we understand and embrace the fact that better results occur through teamwork.

Work Done by the Society

Activities of Autumn Semester

- Video for Counselling Service Team
- Fresher's video
- Harlem shake video with freshers
- Workshop on fundamentals of video editing. Video submissions and inductions to society
